Iran

Summary

I make web applications, from planning and UI/UX design, to Full-stack development and deployment, My main focus is the development. Some of my projects are showcased at: saeedfarhadi.com

Experience

Nasbino

Designer and Full-stack Developer - Tehran 03/2023 - 05/2024
Designed, developed, and deployed a platform for door installers (security doors, interior, etc.) to create an online profile, showcase their work, and find customers. This web app makes it very easy for users to find a door installer based on their area, they can leave reviews and rate installers. I was the sole designer and developer of this project.

Philosophize This!

Web Designer and Developer - Shiraz 09/2022 - 01/2023
"Philosophize This!" is one of the most revered philosophy podcasts on the internet, and my own favorite, as a challenge, I created a better version of its homepage. It's incrementally server-side generated, which leads to great SEO and visibility, and lightning fast performance. There is an audio player with persistent playback when navigating to different pages, a quick search, transcripts and links to listen on different podcast players.

Military Service

Office Manager/reception, Driver - Ahvaz 02/2021 - 09/2022
What I learned during my [mandatory] military service: resilience and adaptability, cooperation and effective communication with people of different backgrounds, team-work and managing groups of people, administrative systems and hierarchy in various organizations.

Self Employed

Web Developer - Shiraz 06/2019 - Present
Designed and developed more than 50 sample projects, as a result I currently host 4 full-stack web applications on a Rocky9 server, I try to write code in a way that would require minimum maintenance and so far it's worked well. I'm always trying to learn more and to keep growing.

Skills

JavaScript/TypeScript, Html & CSS, ReactJS, NextJS, Linux, PostgreSQL, Figma, Adobe XD, Bilingual, English

Education

Architectural Engineering

Ashrafi Esfahani Esfahan, Iran 06/2019
Bachelor's degree in Architecture, What I learned: understanding problems and necessities and coming up with creative solutions, design principles, planning, and managing projects.
